

The most popular automatic parts washer in our range with a basket diameter of 34" (864 mm).

The SAE 34 Jet washer has a rounded front and unique lid that not only saves space but makes it far more user friendly than other spin parts washers on the market. It is an effective and efficient machine for auto workshops for cleaning engine blocks, crankshafts, engine parts and other equipment to a weight of 450 Kg.

- ▶ Economical, Tank can be filled with as little as 80 litres
- ▶ Easy maintenance. Removing one bolt gives access to lower tank for cleaning
- ▶ Adjustable thermostat for optimal performance
- ▶ Easy to load as the top spray bar does not restrict operation
- ▶ Ease of operation with wheels as standard equipment
- ▶ We Recommend using SSC - Super Spray Clean Powder for use in all Jetwashers.

| Technical Characteristics | SAE 34 |
|---------------------------|------------|
| Useful Basket Size | 860 mm |
| Useful Internal Height | 550 mm |
| Load Capacity | 450 kg |
| Height | 1200 mm |
| Depth (front to back) | 950 mm |
| Width (inc. Box) | 965 mm |
| Loading Height | 850 mm |
| Max Flow | 300 lpm |
| Electric Elements | 3.6 kW |
| Max Tank Capacity | 120 Litres |
| Voltage | 240 Volts |
| Current | 15 Amps |
