

**The SAE 42 and SAE 46 Jet washers are the largest models in the SAE Jet washer range with baskets (1066mm) and (1168 mm) and are designed to meet all your ferrous and cast iron parts washing needs.**

These Jet washers pump a mixture of 76°C. hot water and detergent through a series of spray bars saturating the items in the rotating basket.

The combination of detergent, anti-rust additive and the 76°C water results in the cleaned parts flash drying in seconds ready for use.

- ▶ One bolt allows access to lower water tank for easy maintenance.
- ▶ Lid opens through 90° for easy loading by overhead gantry and space below for engine crane use
- ▶ Wheels are standard enabling repositioning closer to site
- ▶ Thermostat with adjustable control
- ▶ Timer switch (0-60 mins) for control of cycle time switch off
- ▶ Internal shell made from 3mm plate
- ▶ Auto cut off when lid is opened during cycle
- ▶ Sight glass ensures adequate water monitoring
- ▶ We Recommend using SSC - Super Spray Clean Powder for use in all Jetwashers.

| Technical Characteristics  | SAE 42     | SAE 46     |
|----------------------------|------------|------------|
| Useful Basket Size         | 1066 mm    | 1168 mm    |
| Useful Internal Height     | 580 mm     | 650 mm     |
| Load Capacity              | 450 kg     | 500 kg     |
| <b>External Dimensions</b> |            |            |
| Height                     | 1240 mm    | 1310 mm    |
| Depth (front to back)      | 1160 mm    | 1270 mm    |
| Width (inc. Box)           | 1360 mm    | 1470 mm    |
| Pump Motor                 | 3.5 kW     | 3.5 kW     |
| Pump Pressure              | 490 kPa    | 490 kPa    |
| Electric Elements          | 10.8 kW    | 14.4 kW    |
| Tank Capacity              | 250 Litres | 285 Litres |
| Timer                      | 0-60 Mins  | 0-60 Mins  |
| Voltage (3 Phase - 5 pin)  | 415 Volts  | 415 Volts  |
| Current                    | 20 Amps    | 20 Amps    |
